PROFESSIONAL SUMMARY

Backend Software Engineer with **3.5 years of experience** specializing in **Node.js, Express.js, microservices, and distributed systems**. Experienced in designing scalable REST APIs, event-driven architectures, and high-performance backend services using **Apache Kafka, Redis, BullMQ, MongoDB, PostgreSQL, and AWS**. Strong background in **system design, database optimization, asynchronous processing, API security, and observability**, with a proven track record of improving system performance, scalability, and reliability.

SKILLS

Backend : Node.js, Express.js, REST API Design, Microservices, API Design, JWT Authentication, OAuth2, RBAC, Django, FastAPI
Languages : JavaScript, TypeScript, Python, SQL
Databases & Caching : MongoDB, PostgreSQL, MySQL, Redis, Elasticsearch, Cassandra, Mongoose
Messaging & Distributed Systems : Apache Kafka, BullMQ, Socket.IO, Server-Sent Events (SSE), WebSockets, Event-Driven Architecture, gRPC
Cloud & DevOps : AWS (EC2, S3), Docker, Kubernetes, CI/CD Pipelines, Nginx, Linux (Ubuntu)

EXPERIENCE

Idea Usher Aug. 2025 – Jul 2026
Software Engineer India, Remote

- Led migration from **monolithic** architecture to **microservices**, improving deployment independence and reducing **bottlenecks by 40%**
- Designed **event-driven architecture** using Apache Kafka, **reducing API response latency by 35%**
- Implemented **distributed caching** with **consistent hashing across 12+ nodes**, eliminating hot-spot failures
- Optimized database performance through **indexing, query tuning, and read replicas**, reducing **query latency by 50%**
- Implemented **idempotent distributed workflows** and exactly-once processing mechanisms, preventing duplicate transactions across services
- Designed **data partitioning and sharding strategies** for horizontally scalable storage, supporting sustained growth without query degradation
- Implemented **distributed tracing and correlation IDs** across microservices, accelerating root-cause analysis for cross-service failures

Unanime Planet Aug. 2023 – Sep. 2025
Software Engineer Portugal, Remote

- **Contributed to microservices architecture**, reducing system downtime by **30%**
- Integrated **Kafka-based messaging systems**, reducing event processing latency by **40%**
- Improved system throughput by **25%** using **Redis caching and BullMQ job queues**
- Managed **AWS infrastructure and optimized resources**, reducing server costs by **15%**
- Implemented **gRPC communication** between services, **improving performance by 50%**
- Designed **fault-tolerant asynchronous workflows** with retry mechanisms and dead-letter queues, improving reliability of distributed job processing
- Implemented **API rate limiting, request validation, and authentication** across backend services, strengthening security and service reliability

EDUCATION

Institute of Engineering and Science, IPS Academy Aug. 2020 – Jun 2024
Bachelor of Tech in Computer Science Indore, India

- Studied core computer science concepts including **Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, OOP, Distributed Systems, and Software Engineering**
