KEY COMPETENCIES

TECHNICAL SKILLS

Frameworks/Libraries: Node.js, React, JUnit, Material-UI, FastAPI, Spring Boot

Languages: Java, JavaScript, C/C++, SQL (Postgres), HTML/CSS

Developer Tools: Git, Docker, TravisCI, MongoDB, VS Code, Visual Studio, Postman, Babel, Netlify, NPM

Libraries: Express, Socket.io, Mongoose, Sequelize, Bcrypt, Joi, Jest, Swagger

PROFESSIONAL EXPERIENCE

Software Engineer Unanime Planet

Sep 2024 - Present

- Played a key role in migrating the monolithic system to microservices architecture, reducing service downtime by 30% and improving scalability.
- Developed and optimized RESTful APIs, handling 1M+ daily requests with an average response time of <100ms.
- Implemented Kafka message brokers and queues, reducing event processing latency by 40%.
- Managed Redis caching and BullMQ for job scheduling, improving system throughput by 25%.
- Configured and maintained AWS server instances, optimizing resource usage and reducing server costs by 15%.
- Integrated gRPC for inter-service communication, reducing payload size and improving data transmission speed by 50%.
- Worked with CI/CD pipelines, reducing deployment time by 60% and ensuring zero-downtime releases.

Backend Engineer Zummit Infolabs

Jul 2024 - Sep 2024

- Developed and maintained full-stack applications using React, Node.js, and SQL/NoSQL, ensuring seamless interaction between frontend and backend components.
- Designed and implemented RESTful APIs to support frontend applications, following best practices for scalability and security.
- Collaborated closely with frontend developers to integrate user-facing elements with server-side logic, optimizing performance and responsiveness.
- Utilized version control systems like Git and participated in code reviews to maintain code quality.

Backend Engineer Intern Creative Thoughts Informatics

Jan 2024 - May 2024

- Developed and maintained backend systems using Node.js and MySQL, ensuring reliability and efficiency.
- Designed and implemented RESTful APIs adhering to best practices.
- Successfully completed multiple projects within the organization.
- Documented APIs using Swagger to facilitate integration.

Backend Engineer Intern Rishi Agastya Technologies

Jun 2023 – Nov 2023

- Developed and maintained RESTful APIs using Express.js and Node.js, leveraging MySQL for data storage and retrieval.
- Implemented JWT-based authentication and authorization with Passport.js.
- Collaborated closely with frontend developers for seamless API integration.

Web Developer Intern DeepShikha Logistics

May 2022 – Jul 2022

- Created a logistics application with an integrated map system.
- Optimized the application using Formspree API for direct client interaction.
- Developed a professional website for the client, available on GitHub.
